HOLZHOFF® 

the green playground & urban equipment company

THE HOLZHOF WORLD

Founded in 1976 as a small family business specialising in agricultural posts, Holzhof has been **transforming urban spaces for fifty years**, creating places designed for enjoyment.

Each project is born from a blend of **passion, creativity and technical expertise**, making schools, parks and public and private spaces safe, welcoming and stimulating. Play becomes an experience, furniture becomes design and functionality; every environment comes to life through innovative, low environmental impact solutions.

Our modern and sustainable headquarters embodies our guiding values: Innovation, respect for the environment and a passion for what we create.

ECO-SUSTAINABILITY AND MATERIALS

We design **eco-friendly, safe and responsible** toys for tomorrow's generation. We use recyclable, non toxic and certified materials, engineered to stand the test of time. Our production model reduces waste, promotes recycling and supports the circular economy, with an ethical and environmentally responsible supply chain. By using FSC® or PEFC-certified wood and durable natural materials, our playground equipment can be **manufactured in compliance with the CAM decree**, promoting low-impact products and green purchasing.

THE PROJECT

FROM CONCEPTION TO REALISATION

EVERYTHING STARTS WITH AN IDEA. THE REST IS A BLEND OF EXPERIENCE, PROFESSIONALISM AND TECHNICAL SKILLS, TRANSFORMING IT INTO AN EXCITING CREATION!

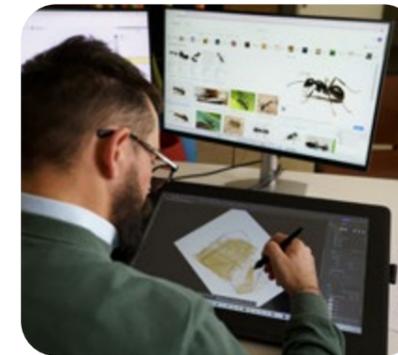

1 From the initial idea to the hand drawn sketch

The idea is born here, from the search for inspiration to the creation of the first hand-drawn sketches.

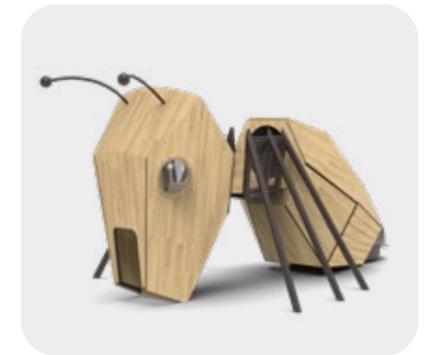

2 Digitisation and presentation

Once the idea has been defined, the project is digitised to present it in its entirety.

3 3D project development and rendering

This is the moment that allows the project to take shape. 3D development is essential.

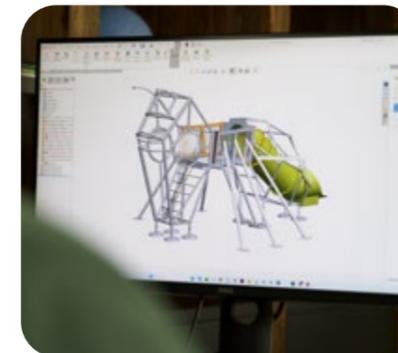

4 Brief with the technical department

Consultation with the technical departments allows us to define all construction and regulatory aspects.

5 Development of the executive project

The project is then refined for executive development, with all specific details defined.

6 Production, delivery and maintenance

We proceed with production, technical testing and installation, guaranteeing maintenance over time.

STANDING BEAR

URSUS | XFY350

This friendly bear, an iconic mountain animal, invites children to engage in figurative play, **stimulating imagination and creativity** through exploration and free play. The structure, featuring an aluminium body clad in eco-friendly and durable black locust wood, encourages movement and motor coordination, offering a dynamic and engaging experience. The structure is completed with two tunnel slides, a rope climb, a pole, two climbing frames, an internal climbing net and panels for playful activities installed within the body of the giant bear.

DIMENSIONS

SITTING BEAR

URSUS SEDUTO | XFY280

The sitting bear, an iconic symbol of the mountains, **welcomes children into a world of figurative play and discovery.** The aluminium structure, clad in black locust wood, is fully playable even inside, with panels and spaces dedicated to fun activities. There are two slides: a smaller one designed for younger children, and a larger, faster tunnel slide for more thrilling descents. The bear stimulates creativity, movement and motor coordination, offering a complete and engaging play experience.

MARMOT

FANTASY | XFY275

This charming structure shaped like a marmot, an animal symbolic of the mountains, invites children to **explore, climb and play in a safe and creative environment**. Made from safe and durable materials such as painted aluminium, black locust wood and recyclable polyethylene, the structure offers play elements including wall bars, nets, a slide and interactive spaces, promoting movement, balance and coordination. With details designed for both fun and safety, this marmot transforms the play area into a stimulating space where children can move freely and give full rein to their imagination.

DIMENSIONS

HORSE

FANTASY | XFY550

Majestic and elegant, the horse invites children to climb, slide and unleash their imaginations. The play route includes a **pole, a rigging, and a net bridge**, stimulating coordination, balance and strength. The tube slide completes the experience, offering a safe and exciting descent. Inclusive thanks to the educational panel and musical game, designed to encourage accessibility and participation for all.

DIMENSIONS

CHAMELON

FANTASY | XFY60

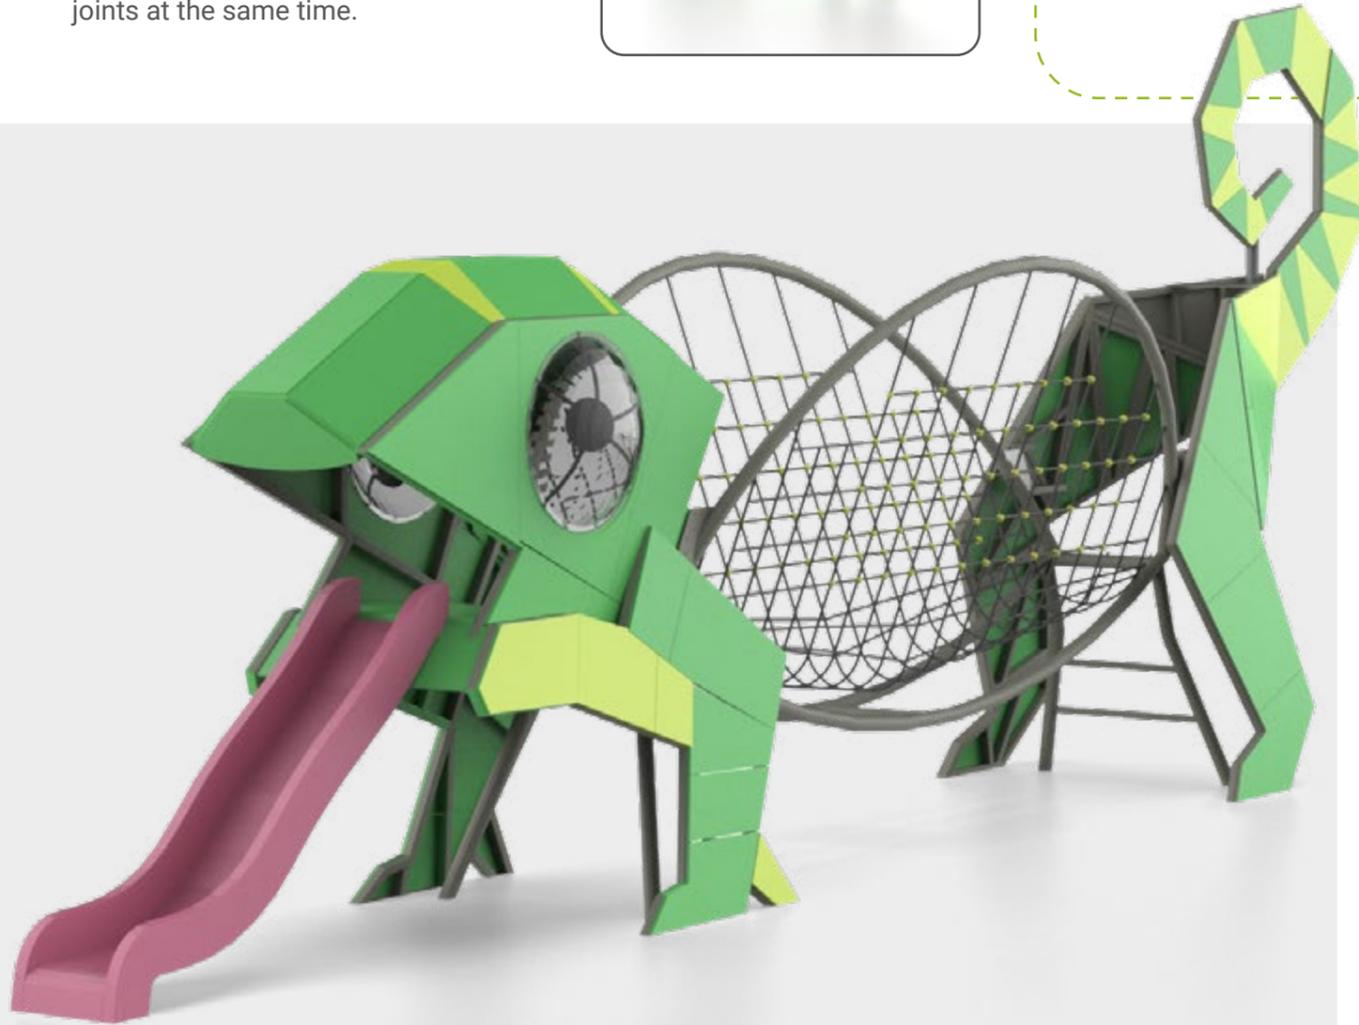

Cheerful and lively, with its bright colours the chameleon invites children to **explore, climb and slide along a stimulating course**. Its body is composed of a solid supporting structure with aluminium uprights, while the polypropylene connecting spheres give it a harmonious appearance and protect the joints at the same time.

Materials

- PE** Polyethylene
-  Black locust wood
- AL** Aluminium

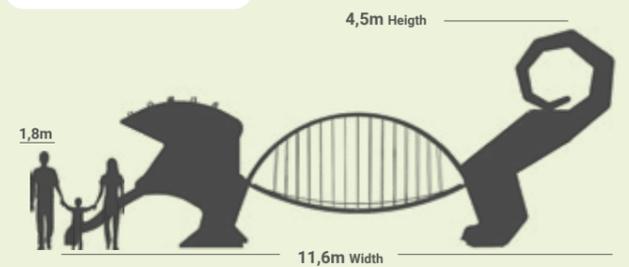

The climbing elements are supported by a six-strand steel rope covered with polypropylene fibres, designed to ensure strength and a comfortable grip during play.

TURTLE

FANTASY | XFY10

This charming turtle-shaped structure invites children to explore, climb and have fun in complete safety. Its rounded form and appealing colours instantly render the turtle a **friendly host, stimulating curiosity and figurative play**. The rotationally moulded polyethylene slide for exciting descents, together with the climbing nets made from polypropylene-coated steel ropes, stimulates coordination and balance.

ACTIVITIES

DIMENSIONS

OCTOPUS

FANTASY | XFY70

This playful octopus-shaped structure immediately captures children's attention, **inviting them to move, climb and play along its winding tentacles**. The long, articulated arms stimulate balance, coordination and movement, turning every route into a little adventure. In addition to motor skills, the octopus stimulates imagination and figurative play, allowing children to invent seafaring stories and explore imaginary worlds. Made from safe and durable materials, the structure combines fun, creativity and safety, transforming the play area into a stimulating and adventurous space.

SHARK

FANTASY | XFY30

This dynamic shark-shaped structure immediately captivates children with its imposing and striking shape. The shark, an animal symbolising adventure and courage, **stimulates curiosity and imaginative play, allowing children to engage in exciting underwater adventures.** The nets and climbing holds offer a variety of play routes, while the polyethylene slide completes the experience. All polyethylene components are recyclable, and the stainless steel fasteners ensure durability and a clean aesthetic.

T-REX

FANTASY | XFY800

This spectacular T-Rex-shaped structure transports children into a pre-historic world of fantasy and adventure. Its large, detailed forms immediately **capture the attention and inspire wonder, allowing little ones to experience the excitement of being real junior palaeontologists.** Made from safe and durable materials, such as painted aluminium, black locust wood and recyclable polyethylene, the structure offers three climbing routes, climbing walls, a pole, a fun slide and an interior equipped with an educational play panel, promoting movement, balance and coordination. The T-Rex transforms the play area into a creative prehistoric kingdom, where children can move about freely and give free rein to their imagination.
